Holdup Frustrated Oliver Cafe Proprietor Marked for Assault

Midnight Tuesday evening, October 13, George Lim, local restaurateur, was the victim of an attempted holdup and assault. This was frustrated owing to the vigilance of the R.C.M.P. Two of the gang of three were apprehended, the other making his getaway.

George Lim, local proprietor of the Oliver Cafe, while on his way home last Tuesday night after business, was attacked by two men in the lane at the rear of his premises. Susing danger, George backed away, shouting for help, and sought protection by placing between himself and his assailants, a nearby telegraph pole. George's cry quickly brought to the scene several members of the R.C.M.P., who had been in concealment near the Cafe. The Police had their suspicions aroused earlier in the week, by the actions of three men, and made plans to have a surveillance kept on the Oliver Cafe and its Proprietor.

On seeing the approaching police, one of the men fired a shot at Sergeant Causey and then bolted, but was apprehended as he dashed out of the alley on to the street. His companion also made a break, but was run down about a block from the scene of the holdup. The third member of the gang disappeared, leaving behind the car used by the trio, outside the premises of Sid Willis.

Earlier in the evening the captured men were in the cafe, and

LACOMBE FIELD DAY

We remind our farmer readers of the Swine Field Day to be held at the Experimental Farm, Lacombe, on Saturday October 17, commencing at 1:30 p.m.

A. W. Peterson of the D.L.S. Branch, Ottawa, a well known authority on Swine, will discuss the swine business from an angle new to the producer.

Those intending to take in this day, are invited to come early and spend a couple of hours before lunch in going over the other phases of the Experimental station's work. Bring a picnic lunch and make up a party of friends and neighbours. Coffee, cream and sugar, will be provided for a basket lunch.

The day will be worth your while, so you Swine Breeders who are anxious to learn all there is to know about this special kind of work, make a note of the date and arrange to attend.

remarked, when paying their bill, to Mr. Lim, "Well, suppose you will be closing up pretty soon."

George Lim is deserving of great credit for his display of courage, as he had been told by the Police to carry on like nothing was wrong.

A length of rubber hose, filled with lead, was taken by the police in the course of events.

Many residents heard the shooting, but did not learn of its significance until the following morning.

The captured men were taken to Calgary by the Police. They gave their names as Louis Page and Kelly.

In the fracas with the Police, Page was shot in the arm. He was placed in the General Hospital, injury is not serious.

United Church Holds Services 31st Anniversary

The Anniversary Services of the Crossfield and District United Church, were held on October 11th and Tuesday evening October 13th.

Rev. J. Rex Brown, of Calgary, was the special speaker at the Sunday Services, and gave helpful and encouraging messages from "The beginning of the Gospel" and "Life's Certainties." At the evening Service, the Choir, with Mrs. P. Fleming as soloist, rendered the anthems, "This is the Day of Light" and "When Daylight Fades."

On Tuesday evening, a delightful and instructive illustrated lecture on "A Day with Jack Miner" was given by Rev. C. E. Rogers, of Carstairs. Musical numbers and readings were also contributed by Miss Verna Pogue, Mrs. P. Fleming, Miss Marion Longmire, Jack and George Fleming and Miss E. Seville. Rev. H. Bosworth, a visiting Minister from Airdrie, brought greetings and entertained the audience with a humorous reading.

Rev. E. Longmire, as minister of the Church, was in charge of the Services.

THE ENQUIRING REPORTER SAYS:

The Rev. and Mrs. J. H. Pickford anticipate taking up residence in the new Manse about the end of the month.

Word has been received of the transfer of the Rev. A. D. Currie to the territory of Mirror, Alberta, and the Curries will be leaving soon.

Mr. and Mrs. R. M. McCool expect to take up residence in Edmonton in about two weeks, their home being rented to Mr. and Mrs. A. E. Edlund.

Mr. J. T. Davis will shortly move into his new premises (former Baptist Parsonage) this month.

Mr. and Mrs. P. C. Griffiths expect to move to Calgary in the very near future.

Bill Walker is making rapid strides in the construction of his new dwelling.

Mr. and Mrs. C. S. Casey and family will shortly move to Carstairs where Mr. Casey will take over the Mechanical end of the Ford Garage at that point.

A large number of friends gathered at the home of Mrs. Fleming, Wednesday afternoon, to say farewell to Mrs. P. C. Griffiths. Mrs. Griffiths was the recipient of a wool blanket.

Glenn (Heavy) Williams will be in hospital for another three weeks at least. He is glad to see any of his old friends, when in Calgary.

Ardent Supporter Reviews Work of Board of Trade

After the poor turnout to the recent Banquet given in honour of the Executive members of the School Fair Board, it might be very opportune to give an outline of the activities since it was organized in 1929.

1929-30

The first President elected was William Laut, and the two outstanding pieces of work carried out under his regime were: (a) The cleaning up of the Park, which, up to this time, had a very neglected appearance. (b) The installation of swings and other playground equipment in the park, for the benefit of the children.

1931

Harry Fitzpatrick took over the office of President, and during this year a substantial piece was built on the east side of the Park, which was called the 25 cent a post drive.

(a) A tour of the District was organized, to which members of the Calgary Board of Trade were invited, and visits paid to the Willow Spring Ranch, where the prize cattle of Frank Collicutt was inspected, and his hospitality enjoyed. The next place visited was the Huser Farms, and the members shown the entire premises and also the splendid hospitality of the Husers. At the conclusion of the trip, a banquet was held in Crossfield, Mr. L. W. Brockington, of Calgary, (now Chairman of the Canadian Radio Commission) being the guest speaker.

Another noteworthy effort in 1930 was the starting of the School Fair under the sponsorship of the Board, which two years later was taken over and has been since run by a School Fair Board independent of the Board of Trade.

(c) Just as the year closed, the Board were invited to be the guests of the Calgary Board of Trade, and a strong delegation from Crossfield enjoyed the visit.

1932

This was another successful year of activities under the leadership of Mr. George Huser, Sr., outstanding amongst which are the following:

(a) The Calgary and Crossfield Boards spent an outstanding day at the farm of Mr. and Mrs. H. P. Wright, viewing the many crop plots, and different items of interest, as well as the charming hospitality of the sponsors.

(b) An inspection of the attractive gardens of Mrs. E. Arnott, who is well known as an outstanding Horticulturist in the Province.

(c) Banquet at which the then Premier (Hon. J. Brownie) was guest speaker.

(d) A luncheon at Calgary as guests of the Calgary Board.

1933

C. H. McMillan was elected President this year, and during his year outstanding things accomplished under his leadership:

(a) Through the loyalty of local merchants, the sign fence on the east side of the nuisance ground was erected, so that parties approaching the Village from the south would be spared the unsightly view of the nuisance ground. The fence cost over \$450.00.

(b) The fence on the north side of the Park was erected, as well as a flag pole in the Park, and a flag donated by the Village Council. The flag was unveiled the 1st of July.

(c) The Board visited the E.P. Ranch this year, and this trip was highly successful.

(d) In the fall the Board visited the

Master Farmer Ships Wheat To U. S. S. R.

On September 8th Mr. H. P. Wright, of Airdrie, received a visit from Mr. A. S. Essipov, Chief of the State Plant Breeding Fund, Russia, and Mr. J. W. Pincus, President of the Amtorg Trading Co., New York, who acted as interpreter for Mr. Essipov.

Mr. Essipov is at present touring Canada, studying Seed Products on the larger Growers' Premises, and made a thorough inspection of Mr. Wright's cleaning plant, and also asked questions on the Elite seed production as carried out by Mr. Wright.

He arranged purchase of 300 bushels of Red Bobs 222, and the shipment left direct for Moscow on Tuesday, October 13th. Full arrangements being handled through the Crop Testing Plan, which is directed by Major Strange of Winnipeg.

In the general discussion Mr. Wright was informed that Russia's big problem is to grow enough to feed her millions and the export end of wheat is a very small part of their programme. In all, throughout the West they purchased about two carloads of Registered and Certified Seeds. Their farming conditions and natural hazards are quite similar to that of our own prairies. Large units of power farming are mostly used.

Mr. Wright informs the Chronicle that Mr. Essipov is a very fine type of gentleman, a trained agriculturist, and that Russia has made (continued on back page)

Year-Round Fire Prevention

Fire prevention week has come and gone, but fire hazards are still extant. If, however, the lessons learned during the recent fire prevention week's campaign are taken to heart and borne in mind, the risks of loss of life and property from this source should be minimized, in any event for a short time until memory withers.

In a country like Western Canada, however, fire prevention week should be every week the year round, so far as the individual is concerned, and certainly from October 1, when hard stoking commences, until about April 7 when furnaces and stoves are extinguished for a short summer season.

As indicated at the outset memory soon lapses, and while impressions of the importance of care and precaution in the handling of fire may be vivid during the course of a public campaign, such as accompanies an event like fire prevention week, they soon fade. Such campaigns serve a useful purpose temporarily, but whether they are effective permanently depends upon the receptiveness and retentiveness of the individual mind.

Moreover, with fire, as with everything else, familiarity breeds contempt. The continuous use of fire in the home or store, day in and day out for 24 hours of the day is apt to result in relaxation of precautionary measures against potential contingencies. This, coupled with increasing impairment and declining efficiency of equipment as the long winter months drag towards a close, combines to enhance the hazards of loss from conflagration.

These observations are inspired by the facts which statistics of Dominion and provincial authorities and fire insurance companies and newspaper stories record.

Despite the annual campaign which is carried on with much vigor and great publicity by these combined forces in an effort to instill precaution in the public mind, the fire demon continues to take a terrible toll of life and property in this Dominion.

When it is reported that on the average, every day in the year one life is sacrificed and more than one person injured by fire and \$110,000 worth of property goes up in smoke in Canada, the phrase "terrible toll" assumes definite significance and gives graphic portrayal to the adage which says that "fire is a good servant but a bad master."

A daily loss of property of \$110,000 is equivalent to approximately \$40,000,000 a year. The enormity of this sacrifice to the fire god can be better appreciated when it is pointed out that the figure is a close parallel to the Dominion government's contribution under relief legislation in each of the years 1931 and 1934, the two years in which federal expenditures for this purpose reached a peak since the depression started. In 1931 the federal government's relief bill amounted to \$42,716,715 and in 1934 it was \$36,930,144, according to the Dominion Bureau of Statistics.

In other words, the people of Canada, on the one hand, are destroying annually \$40,000,000 of property as a result of their carelessness in handling fire and on the other hand, are, in heaviest unemployment years, paying out approximately the same amount for relief of unemployment, through federal taxation channels.

Much concern has been shown and is being shown over the large sums which the federal government has had to pay out in its efforts to grapple with the loss occasioned by unemployment and industrial and agricultural depression. Figures of expenditures for this purpose and articles dealing with various phases of the cost of unemployment and depression have been published almost daily during the past few years, yet but little is heard of the equally heavy loss occasioned by fire, except once a year when the annual fire prevention campaign is in progress.

And yet this heavy fire loss is more easy to cope with than the unemployment and relief problem. All that is required is the exercise of the same care the year round as that which people display in the handling of fire during fire prevention week when the subject is fresh in their minds.

It is not necessary to recapitulate here and now the lessons which have been taught during fire prevention week, the precautions which must be taken to ensure that loved ones will not be burned to death or maimed for life and to prevent the destruction of homes, barns or other buildings and furniture. If only people will train themselves to remember and practice these precautions and to maintain vigilance the year round, this tremendous toll of life and property can be reduced almost to zero.

World-Hiker Paralyzed

Son Of Famous Explorer May Never Walk Again

John Carvelth Wells, son of the famous explorer and who walked around the world in two years, may never walk again. At 25 he lies paralyzed in St. Francis Hospital in London. After a gay and colorful life John Wells started a motion picture publication in London. He planned it, collected the news and the advertisements and printed it himself. For months he worked from 9 a.m. to 4 p.m. One day he collapsed in his office. Within 36 hours he could not move any part of his body. He has recovered the use of his hands and his head. Courage and determination have brought him through, and he declares he will not give up the fight to walk again.

Would Reduce Accidents

More than 7,000 lives could be saved yearly through adequate illumination of major traffic arteries between cities, Paul H. Goodell, chairman of the street lighting committee, reported to the joint annual meeting in Toronto of the American Society of Municipal Engineers and the International Association of Public Works Officials.

Ideals Of The League

Hon. R. B. Bennett Voices Appeal On Behalf Of League Support

Hon. R. B. Bennett, Canadian Conservative leader, told an Australian service club that the British Dominions must support any agency whereby the collective power of mankind prevailed against those threatening annihilation of the civilized world.

Mr. Bennett voiced a fervent appeal on behalf of the ideals of the League of Nations. "Because there has been a failure to realize the fullest hopes for the League, we cannot discard it in its entirety," Mr. Bennett said. "I refuse to believe Napoleon's maxim that God is on the side of the heaviest battalions."

The former Canadian prime minister said that while human nature had defeated the hopes for the League as enunciated by Aristide Briand, the ideal remained. "Although the League lamentably failed to express punitive power against an offending nation, the world must try again," He said that the British Dominions must support the League to this end.

Mr. Bennett asked Australians not to consider Canada as an appendage of the United States. The choicest of our nation laid down their lives on the fields of Flanders in British loyalty and Canada has no idea that any other nation exercises suzerainty or provides its protection. We are proud of our place in the Empire and conscious of our responsibility as being midway between Europe and Asia.

Food Faddists

Freak Diets Turned A Starvation Course By American Doctor

The "freak diets" of the food faddists were termed a starvation course to "physical destruction" by Dr. Milton Bridges, diet expert of Columbia University.

"There does not exist any fruit, meat, fish or other food which in itself is capable of reducing physical weight as much as 1-1,000th of a pound," he said in an address.

If there is one general deficiency in the North American diet today, he added, it is lack of protein. Middle-aged persons in particular are inclined to be anemic because they fail to eat enough meat, eggs, cheese, fish and gelatin.

"It is about time some of our old ideas were exploded," he said.

"The efficacy of fish as a brain food, lettuce to produce sleep, onions to cure a cold, parsley to increase fluid output, broth for strength, port wine and rusty nails for blood building, celery to soothe the nerves, skim milk and bananas for reducing, and last but not least, an apple a day to keep the doctor away, have all been proved without foundation."

Flight Of Birds

Have Been Trans-Atlantic Flyers For Centuries Centuries

When a man climbs into an aeroplane and hops across the ocean and the headlines he is doing something that is countless centuries old. "Birds have been doing this for ages," said Dr. Frederick C. Lincoln, of the biological survey at Washington. He added that he was not belittling the accomplishments of human flyers.

But while man is aided by powerful machinery, compass and charts, Lincoln said the birds depended on instincts and abilities that have puzzled scientists for thousands of years.

The champion distance traveler known to ornithologists is the Arctic tern which nests in the cold regions near the North Pole, then flies across the Atlantic to Europe, and on down to the Antarctic beyond South Africa—an 11,000-mile trip—twice a year.

New Smuggling Racket

Peacock Feathers Are Being Taken Into China From India

And now they're smuggling peacock feathers. Peacock plumage is highly prized in China, but in India peacocks are regarded as holy birds. The Indian customs act forbids the export of the feathers of these "Children of the Gods."

Because of the good market in China for the feathers, many persons now are engaged in smuggling them there.

They have been married just about two months. Lunch was in progress. "Darling!" he said suddenly. "This steak tastes funny!" "Oh, yes, dear," she replied, "I forgot to tell you. I burnt it, so I put some vasoline on it."

First Call for Ogden's!

You'll travel a long way before you'll find as smooth a fine cut as Ogden's. That's why this grand cigarette tobacco serves pleasure, and nothing else but. When you roll a cigarette with Ogden's and touch a light on it you're off on a non-stop run to full smoking enjoyment.

First call for Ogden's—then choose "Chanticleer" or "Vogue" cigarette papers. That's the complete menu for satisfaction in "rolling-your-own." And—the Cellophane-wrapped Ogden's package has the purple-appearing ribbon for quick opening.

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

Gold Production Gains

Production In Canada During 1935 Greatest In History

Gold production in Canada during July, 1935, advanced to 319,505 ounces compared with 316,670 ounces in June and 285,763 ounces in July a year ago. Production during the first seven months of 1935 totalled 2,087,014 ounces, an increase of 15.8 per cent. over the corresponding period of 1934. The price of gold during July averaged \$34.91 per ounce, in Canadian funds, and valued at this price the Canadian output during the month was worth \$11,153,920.

Gold production in Canada during 1935 was the greatest in her history, both in amount and value. The output every month so far this year has been greater than in the corresponding month a year ago, and all indications point to a new high production record for 1935.

SELECTED RECIPES

DUTCH APPLE PIE

5 or 6 tart apples
1 cup brown sugar
1 cup cream

Purify Flour pastry
1/2 teaspoon cinnamon or nutmeg.
Method: 1. Pare apples, core, cut into eighths and arrange evenly in deep pie plate lined with pastry. 2. Four cream over apples and sprinkle sugar and spice on top. 3. Bake in moderate oven 350 degrees for 30 minutes, or until apples are tender.

Made From Shell Cases

A violin made from empty shell cases of the famous French "7's" during the World War, which is played nightly in a London West End restaurant, is believed to be the only brass fiddle in the world. Mr. Tappan, the owner of the instrument, said the violin was made behind the trench lines at Mars de la Faux in 1917 to cheer up officers at mess.

Resembling Real Thing

Visitors detained when approaching the farm house of Fred Wagner, near Spring Coulee, Alberta. A large patch of cucumbers in his garden resembled snakes until closely inspected. One measured 60 inches in length and was coiled to present a perfect likeness.

Increase German Army

Conscription To Raise Fighting Force To 800,000 Men

A widespread increase was ordered in the German military establishment as Nazi officials began conscription to raise their fighting force to 800,000 men under the new two-year compulsory service rule. Hitler, taking a leaf from the Kaiser Wilhelm system, decreed the two-year service Aug. 24 to become effective Oct. 1. The training period previously was one year. The recruits are 21 and 22 years of age—Germany's war babies—parts of the classes of 1914 and 1915. They will be distributed among the land, air and sea forces and represent an increase of from one-fourth to one-third in the nation's armed strength.

Just The Thing

Her newly elevated ladyship had just introduced to a notable electioneer, who had kindly volunteered to entertain the children at a local charity garden fete.

"It is nice of you to say you will entertain the children, Mr. Duntong-Greene. How shall I introduce you?"

"Well, your ladyship, I usually recite extempore."

"Oh, 'Extempore!'" she gasped. "I know of no place more appropriate!"

There are only two classes, those who wish they had enough to eat and those who wish they hadn't eaten so much.

Getting up night after night, breaking your rest, will damage your health. Burial, scolding, suppressed or too frequent passage warns of kidney and bladder trouble. It is dangerous to let these conditions go unchecked. Soothe and strengthen your kidneys and bladder with time-proved—

GIN PILLS FOR THE KIDNEYS

BRITISH TROOPS ENGAGE ARABS IN SERIOUS CLASH

Haifa, Palestine. — Fighting took place on the slopes of historic Mount Carmel, as 1,500 British troops engaged a large force of Arabs in what appeared to be the most serious clash so far in the Palestine disorders.

Three Royal Air Force planes aided the troops in the fighting, which was still going on as night fell. Mortars were being used to shell the Arabs out of their positions of the rocky mountainside.

North Lancashire infantry advanced steadily as the Arabs retreated from rock to rock.

Rifle fire and the booming of the mortars could be clearly heard in Haifa, which lies at the foot of the mountain where according to the Scriptures Elijah destroyed the prophets of Baal.

The slopes of Mount Carmel are covered with pine, olive and laurel groves and are dotted with rocky caverns, providing a highly advantageous defence terrain.

Jerusalem.—At least 16 men were killed or wounded in fighting between Arabs and British troops on Mount Carmel, preliminary reports said.

The official report said none of the British soldiers or airmen had been wounded.

The list of Arab casualties mounted to 18 when another armed Arab band made a raid on the police station at Beit Dajja, Arab town near Jaffa. The police wounded two.

Impending swift punishment for several cases of sniping at troops, a military detachment surrounded an Arab village between Acre and Safed and demolished two houses.

Madrid Hemmed In

Fascist Leaders Promise To Blow City To Pieces Unless It Surrenders

Burgos, Spain. — "We have promised to blow Madrid to pieces" unless it surrenders to the advancing insurgent legions.

"We recommend that the civil population does everything in its power to make the government surrender," read circulars showered on Madrid from Fascist war planes.

"The greater the resistance the greater will be the attack," they read, "Madrid will be bombarded intensely from both land and air."

Fascist lines hemmed in Madrid on three sides with only the eastern sector open.

Steadily the southern and bottom side of the advance was stretched longer past Madrid. The strategy then was to march troops on this line due north, completely boxing the capital.

The insurgent juggernaut under General Francisco Franco radiated swiftness, bowling over town after town in its path, finally halting before San Martin De Valdeleias, whose fall the insurgent leaders expected momentarily.

Study Prisons

Royal Commission May Investigate Conditions In Europe

Moncton, N.B. — The royal commission investigating Canadian penitentiary conditions may cross the Atlantic for a first-hand study of European prisons. Mr. Justice Joseph Archaebault, chairman of the commission, announced recently.

Prisons in the United States will be visited by the commission, the chairman asserted, and it was possible the investigators would go to England, France and Belgium.

Maritime sittings of the commission began at Dorchester, N.B., seat of the Maritime penitentiary.

Empire Education

Urge Students From Canada To Spend One Year In English Schools

Montreal.—An "empire education" should be the goal of Canadian students, according to Dr. John Murray, principal of Exeter University and former member of the British parliament. In his founder's day address at McGill University, Dr. Murray urged students in the Dominion to endeavor to spend one year in an English school during their "impressionable age."

Arabs Arrested

Jerusalem.—The government moved to end sabotage by arresting 36 Arabs and accusing 15 more of damaging the Iraq Petroleum Company pipeline. Brigades have in the past continually destroyed sections of the pipeline and fired escaping oil.

New Cunard-White Star Liner

Sister Ship To Queen Mary Of Larger Dimensions

Glasgow.—The new Cunard-White Star liner to be built by John Brown and Company will likely be 2,000 tons heavier and from 12 to 18 feet longer than the R.M.S. Queen Mary, it was revealed.

William Beardmore and Company of Glasgow, announced it had received the contract to supply hull castings for the new liner, which to date is known only as No. 502.

"The 502 is expected to have rather larger dimensions than the Queen Mary," the company said. "Its tonnage is likely to exceed the 80,773 of the Queen Mary by about 2,000 tons and to be from 12 to 18 feet longer. Thousands of workers throughout the country, as well as at Clydebank, will benefit by the liner's construction. In the case of the Queen Mary, 200 firms in 60 countries supplied accessories for the ship."

The new liner will be laid down on the same ways as those used for the Queen Mary. A contract between the Cunard-White Star Line and John Brown and Company was signed recently.

Swedish Flyer Rescued

Forced Down Off Irish Coast After Atlantic Hop

Valencia, Ireland.—Forced down in the Atlantic on an attempted direct flight from New York to Stockholm, Kurt Bjorkvall was rescued by the French trawler Imbrin off the westernmost point of Ireland.

First word from the long overdue Swedish airmen, who had not been reported since he took off from Floyd Bennett field, came in a wireless message from the trawler.

"Bjorkvall sauve (saved)" it said. "Valencia is an island on the western coast of southern Ireland."

Bjorkvall's flight ended, it was estimated, about 2,375 miles from New York and approximately 1,000 miles short of Stockholm, is goal.

Cosmopolitan Clubs

Edmonton Convention Elects Officers For Western Federation

Edmonton.—Western Federation of Cosmopolitan Clubs re-elected Lovell Smith, of Saskatoon, as its district governor at its one-day convention.

Other officers named were: Lieutenant-governor, A. C. McArthur, Calgary; secretary, Arthur F. Smith, Saskatoon; treasurer, Herman Stevens, Calgary; board of managers, Clair Malcolm, Calgary; W. S. Bringham, Vancouver; Charles L. Gillis, Winnipeg; Herbert Hancock, Edmonton; R. Kenny, Calgary.

Mayor Joseph A. Clark, of Edmonton, was speaker at a dinner held by the federation.

Happy With Soldiers

Lord Tweedsmuir At Home When In Company Of Military Men

Ottawa.—"All my life I have been happiest in the company of soldiers," Lord Tweedsmuir said in a brief address to the officers of the Princess Louise Dragoon Guards at the cavalry regiment's 63rd annual dinner.

The governor-general said that during his recent trans-Canada trip he had met men wearing medals for almost every episode of British army history in the last half-century. One man he met in British Columbia, he said, was wearing an Indian Mutiny medal. The sight of a veteran, he added "is a reminder of the extraordinary part played in war by the Canadian army."

Awarded Victor's Trophy

Johannesburg, S.A. — Charles W. A. Scott, co-winner with Githuthi of the Portsmouth-Johannesburg air race, was awarded the victor's trophy at a dinner in his honor. Cheques totalling 40,000 have been mailed by I. W. Schlesinger, sponsor of the race, to the families of Max Findlay and H. A. Morgan, pilot and radio operator, killed when their plane crashed near Lake Tanganyika.

On Advisory Committee

Edmonton.—W. D. King, Alberta deputy minister of trade and industry, was appointed chairman of the permanent advisory committee under the Trade and Industry Act when the committee met here. Several weeks ago Hon. E. C. Manning, head of the trade and industry department, announced personnel of the committee.

Heavy Tourist Season

London.—Emerging from one of the heaviest tourist seasons on record, the United Kingdom counts 1,150,000,000 spent here by visitors this year, according to travel authorities.

Alberta University Head

W. A. R. Kerr Is Appointed As President To Succeed Dr. Wallace

Edmonton.—Appointment of W. A. R. Kerr as president of the University of Alberta to succeed Dr. R. C. Wallace was announced here under authority of Premier Abernethy. Mr. Kerr, dean of the faculty of arts and sciences at the university since 1914, will be the third president.

Dr. Wallace, who resigned this year to become principal of Queen's University, Kingston, had been president since 1928.

The premier stated the government had felt, as soon as it became known Dr. Wallace was to retire, that a comprehensive survey of the Canadian field of available men should be made before a decision was reached.

"A very complete list was compiled, including several names from the local institution, and full information gathered concerning each," the statement said.

"After reaching a tentative conclusion he had consulted the board of governors, the deans, and several of the senior professors, only to learn that the opinion of all coincided with that of the government. President Kerr then takes up his new responsibilities with the satisfaction of knowing he was the unanimous choice of the government, the board of governors and a large and representative group of the faculty."

RUSSIA CLAIMS NEUTRALITY PACT BEING VIOLATED

Moscow.—The Soviet Union, in a communication, declared it would seek again a free hand in Spain unless Portugal, Italy and Germany immediately halt military assistance to the Spanish insurgents.

The note was delivered by Moseyevich Kagan, Russian representative on the non-intervention committee, to representatives of the signatory countries in London.

"If violations are not stopped immediately, the Soviet government will free itself from any obligations to the agreement," the communication said.

Kagan specially charged Germany, Italy and Portugal with sending arms and war planes to the insurgents in direct violation of the international neutrality pact which they signed.

"The Soviet government," the note declared, "cannot consent to conversion of the non-interference pact into a screen for concealing military assistance rendered the rebels against the government by some participants of the pact."

"The rebels now possess many bombing planes of German and Italian origin which did not belong previously to the Spanish army," it was charged, "and the testimony of weapons proves that supplies of arms from Portugal continue."

Berlin.—Russia's charge that assistance had been given Spanish fascists by Germany, Italy and Portugal was not mentioned in the German press.

Instead, the papers printed, under a Paris dateline, a story reporting the arrival at Alicante, Spain, of the Soviet steamship Neva, which was said to have unloaded a cargo under cover of darkness.

The dispatch said the shipment was declared by the vessel's officers to be 1,360 cases of dry fish, which proved to be rifles; 4,000 boxes in which there was said to be corned beef, but which actually contained cartridges, and 1,200 boxes of supposed hides, which proved to be cloth for uniforms and military belts.

FIRST LORD OF THE ADMIRALTY

Sir Samuel Hoare, coming ashore at Portsmouth after inspecting the Mediterranean fleet—an inspection to which the Italian press ascribed very ulterior motives.

LEGION HEAD ILL

Brig-General Alex. Ross, Dominion President of the Canadian Legion, who has been ordered to rest for three months and has resigned from the War Veterans' Assistance Commission.

Adult Education

Western Educationist Sees Value In Debating Clubs

Halifax.—Aims and advantages of adult education were reviewed here by E. A. Corbett, former extension director of Alberta University and now director of the Canadian Association for Adult Education, at a joint meeting of Halifax service clubs.

"There is no better way of getting young people off the street corners than by holding debates," the western educationist said. There were more than 160 debating clubs in the province of Alberta.

Adult education provided means by which people might bring out by holding debates, the western educationist said. There were more than 160 debating clubs in the province of Alberta. Education of mature people was by no means a new thing. Talents in later life: helped those with little or no education; helped workers to adjust themselves to swiftly-changing industrial life and to acquire a sound philosophy of life. Education of mature people was by no means a new thing. Talents in later life: helped those with little or no education; helped workers to adjust themselves to swiftly-changing industrial life and to acquire a sound philosophy of life.

State Socialism

Says Substantial Part Of Canada Is Subject To Regimentation

Oshawa, Ont.—William H. Moore, Liberal member of parliament for Ontario riding, told a service club meeting that government ownership is "only state socialism."

"We have an example in our railways, which own hotels, laundries and barber shops," said Mr. Moore, discussing government ownership.

"Our central bank marks the coming of the economic state," he continued. "Do you realize that we are in a state socialism today? The relief situation is an aspect, when one-third of our income is distributed to keep alive others."

"A very substantial part of our country is subjected to regimentation. Names sometimes deceive us. Mr. Trotsky and Lenin once called themselves Socialists," he concluded.

League Appointment

Geneva.—Hon. Norman Rogers, Canadian minister of labor, was elected vice-president of the maritime conference, being held in connection with the League of Nations assembly.

Relief Grants

Grants To The Provinces To Remain The Same

Ottawa.—Relief grants-in-aid to the provinces for the third quarter of the current fiscal year will be continued without change, Acting Prime Minister Ernest Lapointe announced. These payments, under the Relief Act for 1936, are subject to revision every three months but have been left unchanged since the start of the fiscal year April 1.

Other matters dealt with at the weekly cabinet council included works contracts and the trade agreement under discussion between a trade mission from Germany and the Dominion government. Mr. Lapointe said progress was made in negotiations with the representatives of the Nazi government, but much remained to be done before an agreement could be announced.

Relief grants-in-aid, initiated by the Bennett administration, involves the outright payment of fixed monthly sums to the provinces for direct relief, with the provincial governments making up any deficiency. During the last session of parliament an appropriation of \$26,000,000 was passed for this purpose.

Payments have been made since April 1 at the rate of \$2,345,687 monthly. Under the last administration the highest monthly rate reached was \$1,757,250 and soon after the present government took office a general increase in these payments brought the monthly total to \$2,066,218.

DEFENCE POLICY FOR CANADA IS A LIVE QUESTION

Victoria.—In a statement declaring Canada has become "defence conscious" in recent months, Hon. Ian Mackenzie, minister of national defence, said primary considerations are a development program for Canadian defence and the extent to which taxpayers are able to meet new burdens and new taxes.

Nature and extent of a program necessary for Canadian defence, he said, were questions for the government, "upon the advice of its experts." The question of new tax burdens is "essentially a question for the parliament and the people of Canada."

Mr. Mackenzie said the defence policy by which he had been governed since taking office and by which he intended to be governed was based upon:

"The general interest of Canada.

"The security and welfare of our Canadian people and Canadian homes.

"Due regard for any obligations that may be ours.

"In other words, our defence policy for Canada is not a dictated policy; it is a policy for the defence of Canada in peace, or in the eventuality of war."

After reviewing the principles laid down at the imperial conference of 1923, he said, "The following are, therefore, our responsibilities:

"(a) Maintenance of international security.

"(b) Preservation of strict neutrality, law and order, within our territorial waters in time of peace.

"(c) Protection of our coasts and sea-borne trade in time of war."

The present government of Canada, he said, "is now and has been since assuming office acutely conscious of its primary responsibility for local defence."

Mr. Mackenzie said the question of national defence was now receiving wide attention through the country. "In recent months Canada has become defence conscious. That is all to the good; as the minister charged with responsibility in this matter, I welcome discussion.

"It was my intention to refrain from further comment on the matter until in the natural course of events I present the government's policy to parliament. However, in the current discussion, I have observed a great deal of misinformation and misunderstanding. There has been a tendency also in certain quarters to try to make a partisan political issue of the grave problems of Canada's defence. This is deplorable and I am sure that the good sense of the Canadian people will give such tendencies a speedy check.

"Public opinion can function effectively only on accurate information, and, as the government will require the assistance of informed public opinion in dealing with the special problems that exist with regard to defence matters at this time, I feel I should point out the essential facts. Healthy discussion based on real understanding will be helpful to all concerned."

WILL ESTABLISH AIR BASES ON THE PACIFIC COAST

Victoria.—"Substantial developments" in all three branches of the service, army, navy and air force, were forecast by Defence Minister Ian Mackenzie in an interview.

Many of the details of contemplated projects had to be worked out by experts but he said that under a tentative scheme a series of air bases might be established along the British Columbia coast. One would be at the south end of Vancouver Island, probably at Esquimalt; another would be at the north end of the island, either on the west coast or at Alert Bay; there might possibly be one at Prince Rupert and in the Queen Charlotte Islands.

The existing Jericho Beach air station in Vancouver would complete the system. Extensions to the hangar space there would go ahead.

Mr. Mackenzie said steps already had been taken to modernize Canada's air equipment with placement of an order from England of seven Blackburn "shark" planes.

Monument To Currie

To Honor Memory Of Commanding Officer Of Canadian Corps

Montreal.—A monument to the late General Sir Arthur Currie, commanding officer of the Canadian corps in the Great War from 1917 to 1919, is to be unveiled in Mount Royal cemetery here Armistice Day, November 11. Construction of the granite memorial is being directed by a committee of former members of the Canadian corps.

In the foundation of the monument which will embody the "Cross of Sacrifice," earth from Vimy Ridge, the Somme and the Ypres salient is to be deposited. The stone erection will bear the following inscription: "Erected by former members of the Canadian corps in memory of General Sir Arthur Currie, G.C.M.G., K.C.B., V.D., L.D., B.C.L., general officer commanding Canadian corps in the field, 1917-1919. Principal and vice-chancellor, McGill University, 1920-1933. 'They served 'till death—why not we?'"

Debt Scheme

Saskatchewan Plan May Be Looked Into By Alberta Government

Edmonton.—Study of all details of the scheme by which debts in Saskatchewan, drawn on the province, would be necessary before any decision will be made by the Alberta government to apply for similar action in this province, it was stated here by provincial treasurer, Charles Cockcroft. "Before making any definite statement, I would like to make a study of the mechanics of the Saskatchewan agreement, to see how such action would fit in with our present plans for rehabilitation of the drought areas," the minister said.

Resume Air Mail Service

Will Be Inaugurated Between Vancouver And Winnipeg In Spring

Vancouver.—An air mail service between Vancouver and Winnipeg will be opened some time next spring and a Canadian coast-to-coast service will be inaugurated probably on July 1. Hon. C. D. Howe, federal minister of marine and transport, announced on his arrival here.

The minister came to Vancouver from Seattle by plane, completing an air tour which took him to New York, Chicago, Dallas and Los Angeles.

Order For Airplanes

Ottawa.—W. J. Sanderson, president of the Fleet Aircraft Corporation of Canada, said his company had received an order for 10 training aircraft from the department of national defence. He did not name the price which was understood to be about \$75,000. The Fleet factory is at Fort Erie, Ont.

Alberta Highways

Edmonton.—Hard surfacing of 1,100 miles of Alberta highways under a four or five-year program will be provided for in recommendations which Hon. W. A. Fallow, minister of public works, will submit to the cabinet for consideration as soon as possible, the minister announced.

For Better Understanding

Rome.—First soundings for an understanding between Great Britain and Italy in the Mediterranean have been made in diplomatic channels, well-informed persons have stated.

Distinguished Traveller Pays Fitting Tribute To Our Mountain Scenery

Many tributes to the great natural beauty of Canada's National Parks in the Rockies have been paid by visitors from at home and abroad. Artists, explorers, and mountaineers have joined in praising the scenic beauty and grandeur of the great mountain playground administered by the Department of the Interior. One of the most recent to add his appreciation of the National Parks in the Rockies is Dr. W. G. N. Van der Sleen, of Haarlem, Holland, distinguished naturalist, writer, and world traveller. Dr. Van der Sleen has, as he describes it himself in a letter to Mr. J. B. Harkin, Commissioner of National Parks in the Department of the Interior, "camped in the Himalayas, tramped the Andes, climbed the volcanoes of Java, and flown over the Alps." Having viewed these masterpieces of nature, he says "that the marvelous mountain scenery in some parts of the Rockies is unsurpassed."

Continuing, Dr. Van der Sleen describes his impressions of his recently concluded six-weeks visit to the Canadian Rockies as follows:

"The most surprising beauty of the Canadian Rockies lies in its lakes, and in the manifold settings nature placed them in. The wonderful Valley of the Ten Peaks forms the ideal frame for a gem like Moraine Lake. The mysterious beauty of Lake O'Hara, mirroring the glaciers on the mountain tops and just separated from them by the dark rocky wall over which the Seven Sisters come tumbling and sparkling, hurrying and tinkling, drawing zigzags of foaming sunlight between the glaciers glowing in the evening sun and the already slumbering lake. Lake O'Hara seems to me one of the most beautiful spots on earth. Then think of the flower fields of Paradise Valley, the Dolomite Sentinels on Sentinel Pass. And all this to be reached in one day from beautiful Lake Louise as a tourist!"

"With immense pleasure I made the whole Rocky Mountain circular tour, enjoyed the beavers on Bow River just as much as the Stoney Indians on the raggedness of the trail via Kananaskis to Jasper to cross the Rockies and Selkirk and delight in the beautiful vistas the train journey offers. We spent a week around Jasper of the Lakes and I found there some of the most imposing glacier-view. When the new road from Jasper to Lake Louise is built some 20 miles farther than it is now, it will be almost too easy to reach the Athabasca and Dome glaciers, floating down from the huge Columbia icefields. That part of the road is going to be counted amongst the most beautiful stretches of scenic highway to be found in the world."

The Care Of Milk

Containers Should Be Scrupulously Clean And Kept Covered

No matter what precautions have been taken to produce clean milk, the milk hygienic methods have been adopted in delivery, it cannot be expected to keep well if it is treated carelessly afterwards.

As soon as possible after delivery, milk should be put in a cool, clean place, and kept there until it is required for use. It deteriorates by exposure to the air, and it should therefore always be kept covered. A further danger that arises if it is left uncovered is contamination by flies.

Milk should never be put in a warm jug or basin, but into scrupulously clean vessels; never into a dusty or soiled container. All vessels used for milk should be rinsed with water at or near boiling point, and then again rinsed with clean, cold water. They should not be wiped with a cloth that has been used for other dishes.

New milk should never be mixed with old milk unless it is for immediate use. The old milk is likely to contain a larger proportion of bacteria, and if the weather is hot summer will occur.

Conserves Soil Moisture

Alfalfa conserves soil moisture and this is better able to withstand hot, dry weather than any other plants. In tests at the Illinois experiment station the three-year average of the rainfall that ran off the field in corn was 27.4 per cent. every year. In contrast, only two-tenths of one per cent. of the water falling on the alfalfa field failed to sink into the soil.

There are about 1,000,000 square miles of lake and river surface on the earth.

Made By Scottish Queen

Beautiful Curtain Now In Royal Museum In Edinburgh

A curtain of carmine woolen cloth, now in the Royal Scottish Museum in Edinburgh, is said to have been worked during the years 1567-1568 by Mary Queen of Scots, when that tragic lady was imprisoned on the island which lies in Loch Leven. The tapestry is divided by borders into two panels, each containing a row of three stylized vases of flowers (carnations, pomegranates, and roses). The borders and vases have a repeating pattern of similar flowers, enclosed by scrolling stems. The whole is worked in a black silk velvet cord and heavily embroidered in a yellow silk brick stitch, which is raised in places by padding. Details are added in satin stitch in various colors.

The character of Mary has long been one of the most fiercely debated questions of history, but her beauty and accomplishments have never been disputed. Born at Linlithgow Palace, brought up at the French court, she spoke three or four languages and wrote easily both in prose and verse. She was, besides, an accomplished needlewoman.

Comparatively Modern Fashion

Socks Had Not Been Heard Of 700 Years Ago

Seven hundred years ago, socks were not known. Men covered their legs with loose cloth wrappings, or with what appear to us as very narrow trousers; and in both cases the leg covering would be bound to the leg with criss-cross leather straps, to make the shape neat.

At the end of the reign of Henry III, men began to emerge from the long robes and cloaks in which they had always been draped, and took to shorter coats and tunics, combined with long tights.

These tights, or hose, were cut from cloth of various kinds and made to fit the leg by having gussets sewn down the sides as far as the ankles. In the reign of Elizabeth the side seams or gussets of the long hose were covered over with embroidery, sometimes of gold or silver thread.

Nowadays the side seams are only there for ornament; but they bring to mind pictures of the days when doublet and hose, ruffs and tapers, Spanish hats and Flemish shoes were the fashion.

Gift From Queen Mary

Museum For Children Receives Miniature Japanese House

The director of Bethnal Green Museum, London, E., lost one of his latest models in the Children's Gallery of houses, recently, reports the Daily News. Thirty of them had taken 13 years to collect. The women who had given many of them decided to take away the Japanese model. The same day it departed another box arrived. It came from Buckingham Palace, and contained a miniature Japanese house almost the same as the one taken away. On a slip of paper was a note in Queen Mary's own handwriting saying that the model was presented to her by King Edward when he returned from the East in 1922.

The model is made in sections like a real Japanese house. The roof comes off and it can all be taken to pieces. It stands 11 inches high and is about 12 inches across. The house is enclosed by a wooden fence on two sides and a hedge on the other two. This is the ninth miniature house which Queen Mary has given to the Bethnal Green children.

New X-Ray Tube

A new X-ray tube making pictures of the bones and organs of the body so clear that old X-ray pictures appear like the blurred work of a novice was shown before the American Roentgen Ray Society. Described as a "rotating anode" tube capable of using high energies, the development was hailed by physicians as one of the outstanding contributions of the present X-ray meeting.

Has Healthy Appetite

"Little Jubilee" Vancouver's bear cub in Stanley Park Zoo, is growing up—and so is his appetite. Within 15 minutes he consumed a dozen apples, a head of celery, rhubarb, cabbage, some lettuce, a large stick of rock candy and some toast. He dusted this off with a peanut desert.

Paris police have the largest collection of criminal fingerprints in the world.

SCHOOL OPENS IN EUROPE

—Fitzpatrick in St. Louis Post-Dispatch

The Royal Post Office

Fully Equipped Branch Always On Duty In Windsor Castle

Not many of the hundreds of thousands of visitors to Windsor who are escorted through the Royal Apartments of Windsor Castle may have discovered (says the Post Office Magazine) that there is a fully equipped branch post office inside the Castle itself, and, indeed, the State apartments are effected in the year round from the Windsor Head Post Office to afford postal services to the officials and servants of the Royal Household. Delivery and collection services are effected in the ordinary way by the postmen when the Court is not in residence, but when the Court is at the Castle a full-time postman-in-waiting is provided extra, and boy messengers-in-waiting for the additional work inside the Castle itself. During the Court visits the Court Postmaster is present in immediate charge, and then H.M.'s official correspondence and despatch boxes are exchanged directly between Buckingham Palace and Windsor Castle by G.P.O. motor vans. The Gentleman Porter still takes over His Majesty's personal items, but the Windsor postman effects delivery to the apartments of the Court officials and visiting Ministers and makes collections in the course of the day for the principal despatches.

Natives Use Postal Service

Letters In Syllabic Posted In The Far North

Nineteen thousand pieces of philatelic mail and several thousand letters, parcels and other matter were handled by G. H. Lawrence of the headquarters staff of the Toronto postal district, postmaster of the Neopole expedition to the Arctic. Even natives are using the postal service established at each Royal Canadian Mounted Police post, letters in syllabic having been posted at some remote points addressed to natives in other parts of the north. Craig Harbor, the most northerly year-round post office in the world, had 5,350 pieces of philatelic mail, including a large letter with a complete collection of Canadian stamps and addressed to the president of the United States.

Cross Stitch Adds Color To Kitchen

PATTERN 5708

Just seeing this pretty homemaker happy at her work is all you need to put you in a cheery mood for doing your own. It's fun both to make and own this practical set of seven. Ideal for shower or holiday gift. Just provide yourself with a bit of cotton or silk floss, and set to work on these simple cross-stitch motifs—they're done in no time! In pattern 5708 you will find a transfer pattern of seven motifs averaging 5 1/2 inches (one for each day of the week); color suggestions; illustrations of all stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Great Britain Reaffirms Claim To Eight Islands In South Sea Archipelago

Historic Quit Rent

Same Horse-Shoes And Nails Tendered To Crown For 500 Years

The claim by the Duke of Athol to present the King with two falcons on Coronation morning is but one of many such claims, says the Glasgow Herald, which recalls another quaint quit rent. Six horse-shoes and 61 nails were tendered recently at the London Law Courts to the Crown, represented by the King's Remembrancer—as the City of London's quit rent for a site known as "The Forge," in the parish of St. Clement Danes. "The Forge" ceremony is believed to date back 700 years. It is astonishing proof of the continuity of tradition that the same horse-shoes and nails have been used for 500 years. After the city solicitor has counted out the shoes and nails, the King's Remembrancer pronounces "a good number." The strip of land paid for is said to have been originally granted for the erection of a forge where repairs could be carried out at a tournament of the Knights Templar. Later on it seems that the city authorities collected the rent and passed it on to the Crown. Although the forge has passed out of existence for hundreds of years, the shoes and nails are still handed over with old-time dignity every autumn.

Clean Bill Of Health

General Health Of Eskimos Reported To Be Good

A clean bill of health was given to the Eskimo population of Canada's eastern Arctic land by doctors who returned on the Hudson's Bay Company's steamship Nascopie, which makes a far-north voyage once every year.

"The general health of the Eskimos appeared to be very good," asserted Dr. R. G. M. Keeling, British physician who joined the ship at Southampton Island and acted as assistant medical officer on the Nascopie.

There were some cases of scabies, but no other epidemic diseases were reported at the points they reached. The white man's plague, tuberculosis, had not obtained a foothold in the north, the doctors advised.

He had noted "several distressing cases of catarrh, which in one or two instances was causing total blindness."

Tourists Escape Duty

Exemption Privileges Results In Heavy Purchases Abroad

Canadians returning from other countries during May, June, July and August brought back goods worth \$1,364,830, which would have been deductible but for the \$100 exemption privilege. Goods brought from the United States were valued at \$1,132,323.

August, peak month for tourist travel, saw imports by travelling Canadians amounted to \$526,662, of which \$430,438 was from the United States. For the three previous months the total was \$838,274, of which \$711,885 was from the United States.

Visitors abroad purchased more clothing than any other single commodity, the total for the summer months being \$693,212, of which \$596,671 worth was bought in the United States. Foodstuffs purchases by tourists amounted to only \$4,499, for the period.

A Mixed Diet

Exotic Combinations Are O.K. Says American Medico

Trenchermen whose appetites run to exotic combinations such as lobster and ice cream took cheer at Chicago from Dr. Clifford Harbort's assurance that it wouldn't hurt them. Even milk and cherries could be eaten without fear of marling up the digestive processes, asserted the Northwestern University medical school faculty member—with the stipulation, however, that the diner partake in moderation. Some other fallacies, he said, are: That onions will cure a cold. That celery is a nerve tonic. That fish is a brain food. That milk is fattening. That oranges cause acid stomach.

Flowers are being sought in the Himalayas for the Royal gardens of England, rare poppies and lilies having been found at 10,000 altitude, and others are being searched for in Bhutan at 15,000 feet.

Great Britain has reaffirmed claims to eight islands in the South Sea Phoenix Archipelago, it was revealed in London. While the territory is said to involve only about 16 square miles, with a population of 60, the islands are believed to be of potential naval value.

The move comes at a moment when the question of colonies for Germany and Italy is becoming increasingly acute in the minds of those working for European peace and brought immediate reaction in Berlin.

Der Angriff, Nazi newspaper of which Dr. Paul Joseph Goebbels, minister of propaganda, was formerly editor, attacked the move, saying it paved the way for annexation by Australia of the whole sub-Arctic regions.

With a streamer heading on page one, the Nazi newspaper calls the action "A gigantic increase in the territory of the British Empire" and termed it evidence of British "hunger for land" and injustice toward German colonial demands.

First news came from German sources, showing how closely the situation is being watched, but it was confirmed officially that two naval sloops, attached to the New Zealand division, had been instructed to "take necessary steps to reaffirm His Majesty's claim" to the Phoenix Islands.

This was done by posting "signs on palm trees on each of the islands. The German newspaper emphasized that England's attitude was not dictated by the necessity to find an outlet for excess population and contrasts Australia's population of less than one per square kilometre with 139 in Germany and 153 in Italy.

The newspaper attacked England's "We hold what we have" attitude as proclaimed at the Margate conference of the Conservative party, now in power.

Agriculture Takes To Air

Planes Spray B.C. Pea Crop To Combat Insects

Agriculture has taken to the air in British Columbia where experimental flights to combat pea aphids have proven successful.

With the tail of his aeroplane spouting poison in billowing clouds, Pilot Sam Cumble, whose "dusted" more than 100 acres of pea fields, adjoining Vancouver's municipal airport. Aerial warfare against the insect will be continued over other fields.

The work was originally undertaken as an experiment. Two huge hoppers containing 650 pounds of poison were strapped to the wings of the aeroplane. Metal tubes were carried under the fuselage where they joined together in a huge dust sprayer.

Flying a straight course down the field the pilot was guided in his work by the white area covered in the dusting process. By doubling back and slightly overlapping, an area of 20 acres was sprayed in half an hour that would have taken days to accomplish by the old method.

McGowan flew as low to the ground as possible at a speed of approximately 85 miles an hour. This is believed the first time an aeroplane has been used in farm work in Canada.

Not Using Their Brains

People Could Do Amazing Things Opinion Of Experts

The so-called experts on mental matters are insistent that people generally are not using a tenth part of their brain capacity and they believe that if they did, the result would be amazing in the way of achievement. Their opinion is that the outstanding leaders in various human activities are simply those who have learned how to use a slightly larger percentage of their mental endowment than the average.

Lookout Directs Traffic

A "crow's nest" has been built high above the platforms of Waterloo station in London to help direct travellers during heavy traffic. From it, lookouts men will see the state of the traffic, receive reports from various inspectors and keep travellers informed about the trains, platforms and times. Inside the lookout is a microphone which is connected with loudspeakers in all parts of the station.

Only about 100 of the 60,000 children who left London schools in the last year have failed to find employment.

FINE CUT

WORLD HAPPENINGS BRIEFLY TOLD

In August branded beef sold in Saskatchewan totalled 141,170 pounds. Of this the red brand was 33,690 pounds and the blue, 107,480.

Negotiations for a new trade agreement between Japan and India have been resumed. The existing accord will expire next March.

King Edward has presented a gold golf ball to the Royal Burgess Golfing Society of Edinburgh to mark the captaincy of the club, which he held last year as Prince of Wales.

Hartlepool, England, bombarded by German warships during the war, when 100 people were killed, welcomed for the first time in 22 years a German naval vessel, the Elbe.

Hon. T. A. Cramer, federal minister of interior, in an interview at Jasper, Alta., said that the Jasper-Banff scenic highway in the Rocky Mountains would be completed in the next two years.

A closer political and economic relationship with the rest of the empire, and participation in Empire defence were essential for Canada, Hon. G. Howard Ferguson told the Canadian Club in Toronto.

Formal request that a segment of the better broadcasting channels be set aside for exclusive use of educational institutions was laid before the United States communications commission as it opened a hearing on proposed revisions of radio regulations.

Another Life For Science

French Noblemen Continued X-Ray Studies To Aid Sick

To the list of those who have given their life for science is now added the name of the clever and charming Duchess de Brocas.

The career of this "Florence Nightingale of France" is one of the most amazing examples of a woman's heroism in medicine.

Beginning at an early age in one of the leading X-ray centres in Paris, she rapidly gained a reputation as a brilliant radiologist.

After her marriage to the Duc de Brocas she insisted on continuing the work of bringing relief to hundreds of patients. Nearly two years ago she was taken ill. The rays had burnt into her skin and affected the tissues.

Her fellow-radiologists begged her to give up the work, and to go into hospital for treatment. "I would rather go on," she said, in a letter.

"We must all die sooner or later. I am a trained radiologist, and to give up my work would be to deprive a large number of people of vital aid."

The duchess invented a special type of electrically heated needle, regarded as a very important advance in X-ray treatment, and helped to perfect other X-ray instruments.

The effect of the rays on her health gradually increased. She lost one of the fingers on her right hand and her hand had to be amputated. Then her arm was poisoned and was also amputated. Still she kept on at her post.

Agricultural Revenue Up

The total gross agricultural revenue of British Columbia is estimated at \$242,419,992 for 1935, an increase of \$28,538,851, or 6.51 per cent, over 1934. Increases are shown in the revenue from farm animals, wool, dairy products, fruit and vegetables, poultry and eggs, fodder crops, hops, nursery stock, and fur-farming. Minor decreases are shown in the revenue from grains, potatoes, honey, tobacco, and seeds. Compared with the preceding year, slightly higher average prices were recorded in most branches of the agricultural industry.

Reformation Stamps

Two new stamps are now on sale at Copenhagen. They have been issued in connection with the 400th anniversary of the Reformation. Both stamps bear a portrait of Hans Tausen (1484-1561), the champion of Luther's doctrines in Denmark, based on a portrait in the Frederiksberg gallery.

Marble Arch, now opposite Edge-ware Road, London, stood until 1851 at the central entrance of Buckingham Palace.

Declares Sea Maps Obsolete

U.S. Coastguard Commander Returns From Charting North Pacific

United States Coastguard Commander L. V. Kiehohn returned to Seattle, Wash., from a charting survey of the far north to declare all "Bering sea maps obsolete."

The commander of the cutter Cheilan announced the discovery of a new North Pacific "deep" more than four miles south of the Aleutian Islands as his vessel returned from the annual summer work of reading the Bering sea and sounding the ocean in charting surveys.

Commander Kiehohn said the survey had proved there is no "gateway" south of the Bering sea to the North Pacific. Last summer the Cheilan discovered an immense underwater mountain range in the Bering sea.

The new ocean deep, 4,199 fathoms, was found in the "Aleutian trough," south of those islands and near the regular north Pacific steamship route, he said.

Important To Europe

Italian Chemists Making High-Grade Wool From Milk

Italian cows, by personal order of Premier Mussolini, are now producing wool and the announcement by Italian chemists that they are making high-grade wool from cow's milk may bring chuckles to western American cattlemen, who never could see any justification for "sheep anyhow; but conversion of the lowly kine into mutton plants is no laughing matter for jittery Europe.

Wool is an important commodity to modern European nations—military uniforms are made from it—and it must be especially necessary in countries operating under dictators, who require an abundant supply to be pulled over the eyes of their subjects. Rome, it will be recalled, was founded on a diet of wolf's milk. The descendants of Romulus and Remus may yet march under triumphal arches, attired in uniforms of cow's milk.

Result Of Experiments

If Allowed To Stand Juices Lose Vitamin C

Orange juice contains from two to three times as much vitamin C as tomato juice. Either of the juices lose vitamin C if allowed to stand before using. These findings were the result of experiments conducted by the United States Department of Agriculture's home economics bureau. The tests included both chemical analysis and feeding trials of four varieties of oranges, two from California and two from Florida, fresh pressed tomatoes and juices from canned tomatoes. It was found that the canned tomatoes contained as much vitamin C as the fresh samples.

Could Not Accept Gift

Horse Offered To King Edward Had To Be Bought

The borough of Salford in Lancashire, England, offered the king as a gift a chestnut gelding called Cherry Grove, bought two years ago for the chief constable. Cherry Grove stands 16 hands high.

It is against etiquette for royalty to accept gifts outside their own immediate circle. But the Duke of Beaufort, master of the horse, inspected Cherry Grove and bought him for £150 (\$750). Henceforth he becomes the king's charger.

Only One Way Out

Debt Can Be Cleared When Borrowing Is Stopped

There is no practical way out of debt except to repay it. A dollar borrowed is a dollar owed and a dollar on which interest must be paid.

We are writing now in the entangling meshes of the debt we have woven for ourselves. There is only one way to free ourselves: to stop public borrowing to spend on government only those sums which can be obtained by reasonable taxation.

The new Waterloo Bridge, London, England, will be opened for traffic at the end of 1938.

These architects who try to make new houses look very old might try renting them for a year. 2172

Pioneer Nurse
Member Of Winnipeg General Hospital Staff Of Early Days.

Nurse Emma Fulman, a member of the Winnipeg General Hospital staff in 1882 died recently. She was born in England in 1852. A graduate of Charing Cross Hospital, London, she volunteered for service when an appeal came for nurses to care for victims of "Red River Fever," then raging in the frontier settlement.

Nurse Fulman saw, the medical profession make remarkable strides of progress during her many years of service. One of her most vivid memories was of the time she found a man semi-conscious on the outskirts of the north end of the city where the hospital was then situated. She brought the man to the hospital where medical examination revealed he was suffering from smallpox. Winnipeg's first isolation ward, a tent next to the hospital, was thus formed.

She had a passionate love for horses and dogs, in her youth having ridden with the hunts (still had her riding crop) and of late years bred colts.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out Of Bed in the Morning Rarin' to Go

The liver should pour out two pints of fluid bile into your bowels daily. If this bile is not there, your food doesn't digest. It just decays in the bowels. Gas builds up. You get constipated. Painful poisons go into the body, and you feel worn, weak and the world looks black.

A new bowel movement doesn't feel good, does it? You need something that works on the liver as well. It takes these good, old pills, called LITTLE LIVER PILLS, to get these two pounds of bile flowing freely and make you feel "up and up." Harshness and griping, they make the bile flow freely. They do the work of nature, but far less laborious or drastic than. Ask for Carter's Little Liver Pills by name! Don't buy cheap imitations.

Diamonds Are Priceless

Famous Mysore Gems May Be Worth A Billion Dollars

The famous Mysore diamonds were worn by the Maharajah of Mysore at a tea party which he gave 262 of his Anglo-Indian friends in London. It was the first time they had been worn outside his own state.

As large as swallows' eggs, the 25 perfectly matched gems lay on a fine chain against the Maharajah's tunic of black gabardine. They did not glitter. They were too big. The Mysore diamonds cannot be priced. They may be worth a billion dollars. The Maharajah wore other jewels besides the Mysore diamonds. In each ear glittered a huge diamond. An emerald half an inch square burned green on his left hand. His turban of gold thread cost \$1,050.

Is Well Informed

London's Finance Committee Knows All About Canadian Cities

Regina citizens were just about bowled over when Alderman Whittingham, Chairman of the City of London Finance Committee, started to tell them where Regina stood financially. The alderman was with the Lord Mayor of London's party touring Canada.

Alderman Whittingham said they were quite pleased with Regina's financial position and he was able to tell Mayor Ellison some points about Regina's civic financing. They kept close tab on those things in financial London and they are frequently more conversant with the actual figures than are members of the councils of the cities concerned.—Windsor Star.

New Windshield Glass

Screens Out Headlight Glare Without Impairing Driver's Vision

The latest development in highway safety, a "glareless" windshield glass, was disclosed at the convention in Buffalo of the Illuminating Engineering Society.

L. W. Chubb, research director of the Westinghouse Electric & Manufacturing Co., described the development.

Designers of the glass claim it will eliminate one of the greatest causes of automobile accidents by "accreting out" the glare of oncoming headlights without impairing the driver's vision.

Canada's Fire Losses

Fire losses in Canada during the week ending September 30 were estimated by the Monetary Times at \$192,200 as compared with \$232,000 the preceding week and \$96,450 the corresponding week last year. Fire losses from January 1 to September 30 this year totalled \$10,945,350 as compared with \$9,915,225 for the same period last year.

Crooning might be classed as "swing" music. Some authorities, however, opine it calls for more severe punishment.

young MOTHERS

Take no chances. Children's colds are best treated without "dosing." At bedtime, just rub on
VICKS VAPORUB

PROVED BY 2 GENERATIONS

Creating Pasture Lands

Research Has Done Much For Welsh Mountain Area

Scientists working at the plant-breeding station of the University of Wales, have almost completed experiments in breeding grasses which will stand the rigors of Welsh mountain climate.

There is a dearth of suitable pasture land in Wales, but nearly 20 years' research now makes it possible to produce pastures in strange places.

One outcome of the labors will be to facilitate all-season crops of strawberries, raspberries, apples, pears, and vegetables normally available only during a few weeks in the year.

Helped Build A Church

Tiger Skin Was Presented To Missionary In India

The "tiger skin that built a church," was on exhibition at Chalmers church, Ottawa, where the seventh General Council of the United Church of Canada was in session. The double-striped skin presented several years ago to Rev. H. H. Smith, missionary at Sitamau, Northern India, by the Subah Sahib of Maundassur, was sold when Mr. Smith found himself short of funds with which he intended to build a new church. It brought \$700, enough to allow completion of the church.

Things Are Reversed

Instead of people watching the animals feeding in the London zoo, the animals are sitting back in their cages and watching people eat. Giraffes, tigers and baboons can now see fashionable Mayfair dining on the restaurant balcony and taking light refreshments in the floodlit gardens. It is London's nearest approach to a Continental beer garden.

Show Your Hand in Smart Crochet

Household Arts by Alice Brooks

AN Exclusive Model in Crochet

PATTERN 5710

Nippy daps, warm ensembles, bid you show your hand in smart crochet, and more particularly, in these gracefully styled gauntlets. They work up fast, for two identical pieces, crocheted lengthwise, form the hands. The smart, fared cuffs in simple rib stitch, are done extra, a bit of contrasting yarn adding a touch of color. In pattern 5710 you will find directions for making these gloves; an illustration of them and of all stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Appleford's
Para-Sani

You'll save its modest cost before half the roll is used. That's because this heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

HEAVY WAXED PAPER

Warehouses at Calgary, Edmonton, Regina and Winnipeg

SUNDAY SCHOOL LESSON OCTOBER 18

THE SPOKEN AND THE WRITTEN WORD

Golden text: The word of God is living and sharper than any two-edged sword. Hebrews 4:12.
Lesson: Acts 17:1-15; Thessalonians 2:1-12.
Devotional reading: Psalm 119:9-16.

Explanations And Comments

Successful Evangelism at Thessalonica, Acts 17:1-4. Although at Philippi we had suffered greatly and had been insulted, yet on we came to your city and boldly declared to you the gospel of God in spite of great opposition—in some such words Paul later wrote to the Thessalonians (1 Thess. 2:2). On the way Paul and his companions passed through the cities of Amphipolis and Apollonia. At Thessalonica they tarried several months, as we know from Paul's letters, but Luke our historian, gives an account of Paul's preaching for only three successive sabbaths. There was a synagogue here and in it on those Sabbaths Paul "reasoned from the Scriptures," that is, cited scripture passages which were prophetic of the Christ; and then showed that Jesus fulfilled these prophecies, that it behooved the Christ to suffer and to rise again from the dead. Thus he reasoned, or argued, that the Jesus whom he proclaimed to them is the Christ.

The result of Paul's preaching was that some of the Jews, many of the devout Greeks (Greeks who attended the synagogue and worshipped God), and many of the chief women, were convinced of the truth of his message and "consorted with Paul and Silas," cast their lot in with them and shared their way of life. They were afterwards zealous in extending the good news Paul brought to them, for in his letter Paul says: "From you hath sounded forth the word of the Lord, not only in Macedonia and Achaia (Greece), but in every place your faith to Godward is gone forth."

On to Berea, Acts 17:10-12. Paul and Silas left Thessalonica at night. They continued their way westward to the city of Berea. There in the synagogue they found unprejudiced Jews who were willing to give him a hearing. Finding that Paul's words and the prophecies were in agreement, many of the Berean Jews believed, as did also many of the Greek women of honorable estate, and many of the Greek men.

Knows His Own Home

"The Jeep," mascot of the R.M.S. Nacopie, may be just another cat to some folks, but he knows when his home port is reached. Taken on at Halifax when still a kitten "The Jeep" steadfastly refused to leave the ship at any port of call. When the boat reached Halifax he was the first down the gangplank.

A genius is a man who can do almost anything—but make a living.

I'VE GOT TO SCRUB OUT THE TOILET BOWL AND HOW I HATE IT

BETTER USE GILLETTE'S LYE AND FLUSH OFF THE STAINS

NO NEED TO RUB AND SCRUB

Gillette's Pure Flake Lye takes off those ugly yellow stains and won't harm enamel or plumbing. Once a week pour it full strength down toilet bowls and drains. It kills germs, banishes odors as it cleans. Frees trap and drainpipe from obstructions. And use Gillette's Lye in solution* for all kinds of heavy cleaning tasks. It eats dirt. Saves you hard work. Always keep a tin on hand.

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillette's Lye Booklet tells dozens of ways this powerful cleanser and disinfectant makes housework easier. Also tells how to make good soap at home and gives helpful information on farm sanitation. Write for a free copy to Standard Brands Ltd., Fraser Ave. A, Liberty St., Toronto, Ont.

An Important Discovery

The cause of cataracts, which has baffled the medical world for centuries, may be a step nearer solution with the discovery by Dr. Agnes Fay Morgan, chairman of the Department of Household Science at the University of California, that certain food extracts have a material effect on the eye malady.

District Echoes

Mr. T. G. Sefton was a business visitor to Calgary Friday.

Miss Kathleen Mair is spending a few weeks at Edmonton.

Austin Whillans, of Calgary, was a weekend visitor at his home here.

Mr. and Mrs. T. Mair and Maxine spent last weekend at Sedgewick, Alta., east of Edmonton.

W. H. Harrison, of Cessford, Alta., is 'Mechanic-in-Chief' at the O. K. Garage.

Mrs. George Zang, of Calgary, (nee Miss Lillian Johnson) visited her parents and brothers over the week-end.

Ken and Norma Miller, of Olds, are staying at the D. J. Hall home while Mr. and Mrs. Miller are at Washington, U.S.A., attending the funeral of Mr. Miller's brother.

Mr. Horton, of the Vegreville Observer, stopped off at the Chronicle Office Friday morning while on his way to Calgary to attend the Press Convention there. He travelled by car.

SEE—"The Scarecrow Creeps" at the U.F.A. Hall.

Mr. and Mrs. H. Ballam spent the holiday in Calgary.

Mrs. W. Pogue was a Calgary visitor over the weekend.

Wm. Urquhart spent a few days last week at Elnora, visiting his brother.

Miss Wilda Laust, of Calgary, is spending a few days at her home in town.

C. C. Stafford is confined to his home through illness. A speedy recovery is wished for him by his friends.

Mrs. E. S. Halliday, of Calgary, was a visitor in town from Thursday to Sunday, visiting with her daughter, Mrs. R. T. Amery.

William Murdoch and daughter Vivian, of Clive Alberta, were visitors at the G. G. Murdoch home over the weekend.

Mr. and Mrs. Morley Turner, of Calgary, were weekend visitors at the home of Mr. and Mrs. J. Beishaw.

Mr. and Mrs. A. B. Evenson of Banff, visited with the former's sister, Mrs. G. Y. McLean, over the weekend.

Rev. J. R. and Mrs. Geeson, of Didsbury, were visitors with Rev. and Mrs. Longmire on Thanksgiving.

Mrs. R. T. Amery and children and Mr. and Mrs. H. Halliday, of Didsbury, were holiday guests at the home of their mother, Mrs. E. S. Halliday.

The Chronicle learns of the engagement of Miss Lila Casey, of Leslieville, (formerly Crossfield) to Mr. Harold Allen, of Turner Valley.

The 32nd Fall Live Stock Sale will be held at the Exhibition Grounds Calgary, Wednesday, Thursday, and Friday, October 21st, 22nd and 23rd.

Canadian Pacific Express Money Orders are the ideal way of remitting. Canadian Express Travellers Cheques are ideal Travel Companions. Obtainable at the Chronicle Office and from the local agent, P. Fleming.

A big crowd attended the Supper and Concert at Dog Pound Monday, and report a good time. We are obtaining a verbatim report from our special correspondent at Dog Pound, and this will be fully described in these columns next week.

Lovers of the "Light Fantastic" are pleased to note that the Regular Saturday Night Dance for October 17, will not be held. Make a point therefore of attending the dance on Friday evening after the local Amateur show. Popular prices, and the popular Gloom Chasers Orchestra.

CAPTURED AT DIDSBURY

Lorne O'Mara, Eckville, Alta., helped himself to a car battery belonging to A. Witke's brother-in-law, and three hours later found himself in the clutches of the law. Corp. Cameron, of Crossfield, effected the capture. He appeared before Magistrate Gordon.

Activities of Societies Etc.

I.O.O.F.

Many Calgary Oddfellows visited Crossfield Wednesday, for the presentation of the traveling gavel to the local lodge by Calgary brothers.

Prominent among the visitors were: George E. Vies, D.D.G.M.; C. E. Davis, grand warden; D. F. Christie, P.G.M.; A. Walton, P.D.D.G.M.; W. F. Rodgers, P.D.D.M.; E. Dauncey, P.G.P., and W. Baird, D.D.G.M.

Refreshments were served by Crossfield Rebekah Lodge No 62, in a very able manner, after which songs, speeches and dancing were indulged in until 12 p.m. Every-one leaving with the good old words "Happy to meet, Sorry to part, Happy to meet again."

SOCIAL CREDIT

The Crossfield group will hold its regular meeting on Thursday October 22nd at 8:30 p.m. in the Masonic Hall.

Special speaker in attendance

LADIES AID
